## Summary

Motivated and detail-oriented Computer Science student at NJIT with a foundational understanding of front-end web development principles, including HTML, and CSS. Eager to apply and expand my skills in a professional setting, with a strong focus on building user-friendly and responsive web interfaces.

## Education

**New Jersey Institute of Technology (NJIT)**                                               **Newark, NJ**
*Bachelor of Science in Computer Science*                              **Expected Graduation: May 2027**
- Relevant Coursework: Designing the User Experience, Web Development Fundamentals (HTML, CSS), Programming Languages (Java, Python)
- GPA: 3.2

## Technical Skills

- Languages: Python, Java, C++, HTML (learning), CSS (learning)
- Tools and Technologies: Canva, Axure RP, Git/GitHub, VS Code, Responsive Web Design, Webstorm
- Concepts: Front-End Web Development, UX/UI Design, Wireframing, Prototyping, Object-Oriented Programming

## Academic Projects

**Community Connection UX Project - CommUnity - NJIT (Ongoing)**
- Conducted user research through competitor analysis to define key user personas, informing a user-centric design approach.
- Designed a low-fidelity wireframe using Canva and a functional, interactive prototype to demonstrate core user flows, with a focus on intuitive navigation and usability (currently working on the Axure RP Wireframe).

## Professional Experience

**Crumbl Cookies**                                                                   **Morris Plains, NJ**
*Baker*                                                                           **February 2025 - Present**
- Baking cookies to perfection while maintaining high-quality standards.
- Managed ticketing and customer service for over 50 orders per hour, ensuring customer satisfaction in a fast-paced environment..
- Collaborated with team members to optimize workflows and meet daily production goals.

**Code Ninjas**                                                                       **Parsippany, NJ**
*Sensei*                                                                          **March 2024 - August 2024**
- Taught block coding to students aged 7-14, guiding them through 20+ project-based lessons.
- Simplified complex programming concepts, such as conditional statements and loops, for young learners. These are fundamental to building logic in front-end JavaScript.
- Collaborated with a team of instructors to innovate teaching methods which developed social skills.
- Mentored over 15 students in project-based learning, which can be likened to building a front-end feature from scratch, requiring attention to detail and a structured approach.

**Nutra-Med Packaging Inc.**                                                           **Whippany, NJ**
*Computer Science Intern*                                                          **May 2024 - June 2024**
- Contributed to the redesign of the company website, focusing on front-end updates to enhance the user interface and navigation.
- Learned and applied serialization process concepts to real-world operations.
- Conducted background checks and organized HR files in compliance with internal processes.

## Leadership and Activities

- Member, Girl Up
- Member, Association of Computing Machinery (ACM)
